SEXUAL ABUSE, AND VERBAL ABUSE)

Findings in administrative investigations of major unusual incidents in category A shall be based upon a preponderance of evidence standard. "Preponderance of evidence" means that credible evidence indicates that it is more probable than not that the incident occurred. There are three possible findings of a category A administrative investigation:

- "Substantiated" means there is a preponderance of evidence that the alleged incident occurred.
- "Unsubstantiated/insufficient evidence" means there is insufficient evidence to substantiate the allegation. "Insufficient evidence" means there is not a preponderance of evidence to support the allegation or there is conflicting evidence that is inconclusive.
- "Unsubstantiated/unfounded" means the allegation is unfounded. "Unfounded" means the evidence supports a finding that the alleged incident did not or could not have occurred.

Steps for Investigating Major Unusual Incidents in Category A

1. Commence the administrative investigation immediately, or no later than twenty-four hours after discovery of the incident. "Commencing the administrative investigation" means any of the following:
 - a. Interviewing the reporter of the incident.
 - b. Gathering relevant documents such as nursing notes, progress notes, or incident report.

- c. Notifying law enforcement or the public children's services agency and documenting the time, date, and name of the person notified.
If law enforcement or the public children's services agency decides not to conduct an investigation, the investigative agent shall commence the administrative investigation.
 - d. Initiating interviews with witnesses or victims.
2. Interview the victim no later than three working days following notification of the major unusual incident and document the results. Exceptions to this requirement are when the individual is unable to provide any information or the investigative agent determines that the circumstances warrant interviewing the individual later in the administrative investigation.
3. Visit the scene of the incident.
4. Secure physical evidence. Take photographs of injuries, as applicable. Secure and sketch and/or photograph the scene of the incident. Provide a detailed description of any injury that may have resulted from the incident, including the shape, color, and size. Take a photograph of any injury that may have resulted from the incident; record the name of the person who took the photograph and the date and time the photograph was taken. Provide a written description of the physical evidence along with the date, time, and location of the gathering of evidence. 8. Interview medical professionals as to the possible cause/age of the injuries and document the interviews. Include a statement from a qualified medical professional as to whether or not the injury is consistent with the description of the incident, including the apparent age of the injury and probable force necessary to cause the injury. Include a description of treatment received or ordered. Qualified medical professionals include, but are not limited to, physicians, nurses, emergency medical technicians, and therapists.
